WASDE-435 Approved by the World Agricultural Outlook Board June 9, 2006

Note: Because planting of spring crops is still underway in the Northern Hemisphere and remains several months away in the Southern Hemisphere, these projections are tentative. Variation in area and yields may result from weather developments, economic factors, and policy changes. National Agricultural Statistics Service (NASS) forecasts are used for U.S. winter wheat. For other U.S. crops, the March 31 NASS *Prospective Plantings* report is used for planted acreage, and methods used to project harvested acreage and yield are noted on each table.

WHEAT: The 2006/07 U.S. wheat crop is lowered 59 million bushels from last month, based on lower forecast yield of winter wheat. Projected spring wheat production is unchanged. Imports are raised 5 million bushels. Wheat feed and residual use is lowered 25 million bushels, and seed use is raised 2 million. Ending stocks are lowered 32 million bushels to 416 million. The 2006/07 price range is increased 10 cents on both ends of the range to $3.60 to $4.20 per bushel, compared with an estimated $3.42 for 2005/06.

The 2006/07 global wheat outlook includes little change in total supply and use, compared with last month. Higher production in Ukraine, Pakistan, Canada, EU-25, and several other countries is offset by lower production in the United States, Argentina, Russia, and other countries. Exports from Pakistan and Ukraine are raised a combined 1 million tons, while Argentine exports are lowered 1 million. Global ending stocks remain the lowest in 25 years.

COARSE GRAINS: The 2006/07 U.S. outlook for coarse grains includes projected lower beginning stocks, no change in use, and no change in the price range of $2.25 to $2.65 per bushel, compared with last month.

For 2005/06, exports are increased 50 million bushels, based on the recent rapid pace of shipments and sales, and ending stocks are lowered by that amount. The old-crop price range of $1.90 to $2.10 per bushel is unchanged.

The 2006/07 global coarse grains outlook includes higher production and exports and little change in ending stocks compared with last month. The major highlight is an increase in China's corn production at 138 million tons, up 3 million from last month and slightly below the revised 2005/06 crop. China's 2005/06 corn production is raised 5.4 million tons to 139.4 million tons based on a recent report by China's National Bureau of Statistics (NBS).

While the NBS only reported total grain area, other information from China indicates the corn area was larger than USDA's estimate. With last year's corn area increased and indications that this year's corn area is up from 2005/06, projected 2006/07 corn area is raised from last month. China's domestic use is increased for both years. Despite larger crops, China's domestic prices have strengthened and stocks, while forecast slightly higher than last month, will continue to tighten in 2006/07. In addition, China's 2005/06 export estimate is lowered 1 million tons this month, based on a lack of export sales.

World barley production is projected higher this month, mainly due to higher production in Russia more than offsetting smaller crops in Morocco and Tunisia.

RICE: No changes are made to the U.S. rice supply and use projections for 2005/06 and 2006/07. However, the season-average farm price range for 2005/06 is narrowed $0.05 per cwt on each end to $7.65 to $7.75 per cwt; and the season-average farm price for 2006/07 is unchanged at $9.00 to $9.50 per cwt.

Global 2006/07 rice production and consumption are increased from last month while ending stocks are lowered. Global 2006/07 rice production is projected at a record 417.5 million tons, up 0.5 million from last month. The increase in production is due primarily to larger crops projected for India (+1.0 million tons), Nepal, the Philippines, and Iran; which is partially offset by a reduction for China (-1.0 million tons). World consumption is projected at a record 424.8 million tons, up 1.6 million tons from last month. Ending stocks are projected at 60 million tons, down nearly 2 million tons from last month. The 2005/06 production estimate for China is lowered 1 million tons to 126.4 million tons based on official data from the government of China.

OILSEEDS: U.S. oilseed supply and use prospects for 2006/07 are fractionally higher this month, mostly reflecting a small increase in soybean beginning stocks. Soybean production is projected at 3,080 billion bushels, unchanged from last month. Soybean stocks are projected at a record 655 million bushels, up 5 million from last month and up 85 million from 2005/06.

The U.S. season-average soybean price for 2006/07 is unchanged at $5.10 to $6.10 per bushel, compared with a projected $5.65 per bushel in 2005/06. Soybean meal prices for 2006/07 are projected at $155 to $185 per short ton and soybean oil prices are projected at 22.5 to 26.5 cents per pound, both unchanged from last month.

Changes for 2005/06 include a 5-million bushel reduction in soybean crush reflecting lower-than-expected domestic soybean meal use in recent months. Increased soybean meal exports partly offset reduced domestic use. Soybean oil production, exports, and domestic use are all reduced this month, leaving soybean oil stocks fractionally lower. Soybean ending stocks are increased 5 million bushels to 570 million bushels. Soybean oil prices for 2005/06 are projected at 23.25 cents per pound, up 0.25 cents.

Global oilseed production for 2006/07 is projected at 389.4 million tons, down 0.7 million tons from 2005/06 and down 0.6 million tons from last month. Foreign oilseed production is projected at 294.7 million tons, up 0.8 million tons from 2005/06. Global soybean production is projected to increase 1.9 million tons to a record 222 million tons. Higher yields in Brazil and increased area for Argentina will help push South American production to a record 105 million tons, up 3 million from 2005/06. The Brazilian crop is projected at 56 million tons, up only slightly from a revised estimate of 55.7 million tons for 2005/06 as higher yields mostly offset reduced harvested area. Argentina soybean production is projected at a record 41.3 million tons due to increased area. Global production of high-oil content seed is down 4 percent due to lower rapeseed and sunflowerseed production. Rapeseed production is projected lower for Canada and India, and production for EU-25 and China are projected almost unchanged from 2005/06. Sunflowerseed production is lower for 2006/07 mainly due to reduced crop prospects for Russia and Ukraine.

Global protein meal consumption is projected to increase 4 percent in 2006/07 mainly due to gains for soybean meal. Protein meal consumption is projected to increase 7 percent for China, which accounts for 40 percent of the increase in global protein consumption. World soybean trade is projected to reach a record 71 million tons, up 7 percent from 2005/06. China accounts for most of the increase in global trade with imports expanding 4 million tons to 31.5 million tons. Global vegetable oil consumption is projected to rise 5 percent led by increases for EU-25, China, and India. Increased consumption in EU-25 is primarily due to increased industrial use of rapeseed and palm oil as biodiesel production continues to expand. Global vegetable oil ending stocks are projected to decrease 9 percent from 2005/06.

SUGAR: Projected 2006/07 U.S. sugar supply is lowered from last month, due to lower beginning stocks. Sugar use is unchanged. Ending stocks are lowered 48,000 tons.

For 2005/06, total supply is increased slightly. Beet sugar production forecast by processors, as compiled by the Farm Service Agency, is lowered 38,000 tons. Imports are raised 50,000 tons, as increases in high-tier imports and sugar for re-export more than offset lower tariff rate quota (TRQ) imports. Shortfall in filling the TRQ is increased 75,000 tons to 240,000 tons. Total use is increased 60,000 tons due to increases in exports, deliveries of sugar to manufacturers for re-export in sugar-containing products, and use in making alcohol and animal feed.

LIVESTOCK, POULTRY, AND DAIRY: *NOTE: Due to uncertainties as to the length of the bans on trade in ruminants and ruminant products because of the discovery of BSE in the United States and Canada, forecasts for 2006 and 2007 assume a continuation of policies currently in place among U.S. trading partners. The suspension of beef imports by Japan is considered to be temporary pending the resolution of importer concerns. U.S. beef exports to South Korea are not forecast pending implementation of import regulations by South Korea.*

Compared with last month, forecast total U.S. meat production is fractionally lower. Changes in production are limited to second quarter adjustments to beef and pork forecasts. Beef production is lowered as the pace of slaughter is slower than expected last month. Pork production is increased on expectations of slightly higher carcass weights this quarter. Poultry production forecasts are unchanged for 2006. Meat production forecasts for 2007 are unchanged.

Export forecasts for 2006 and 2007 beef, pork, and broilers are raised from last month. Exports during the first quarter were stronger than expected. With good global economic growth prospects and favorable exchange rates, beef, pork, and broiler exports are raised throughout 2006 and 2007. Although broiler exports to some markets remain limited by Avian Influenza concerns, relatively low broiler parts prices will encourage higher exports.

Little change is made to price forecasts.

The milk production forecast for 2006 is lowered slightly from last month, but the 2007 forecast is unchanged. Milk cow numbers in 2006 are raised fractionally, but the increase is offset by slightly slower-than-expected growth in milk per cow. Higher feed costs are expected to result in slower growth in milk per cow.

Cheese demand remains relatively strong and in the face of slightly tighter milk output, the cheese price forecast is raised from last month. However, forecast butter prices are unchanged and nonfat dry milk (NDM) and whey prices for 2006 and 2007 are lowered fractionally from last month reflecting weaker demand. The Class III price forecast for 2006 is unchanged from last month because increased cheese prices offset lower whey prices. The Class IV price forecast is reduced slightly due to lower NDM prices. The forecast range for the all milk price for 2006 is narrowed to $12.40-$12.80 per cwt. The Class III price for 2007 is reduced due to fractionally lower whey prices, but the Class IV and the all milk price forecasts for 2007 are unchanged.

COTTON: This month's 2006/07 U.S. cotton projections include slight increases in beginning stocks and total disappearance, leaving ending stocks unchanged at 4.9 million bales. The production estimate is unchanged from last month. Domestic mill use is reduced 3.5 percent to 5.6 million bales, reflecting lost capacity from the recent closing of a major mill. Exports are raised 300,000 bales to 16.8 million, the same as the revised level for 2005/06, due mainly to an increase in exportable supplies. The 2005/06 export estimate is down slightly based on the recent pace of weekly shipments.

The 2006/07 world projections, which include the first individual estimates for foreign countries outside China, include only minor revisions from last month's aggregate totals. World production and ending stocks are projected marginally lower, while consumption is projected marginally higher. China's production is reduced 500,000 bales from last month based on lower forecast area. Global ending stocks are now projected 11 percent below the beginning level.

For 2005/06, world production is raised about 700,000 bales, as increases for India, Pakistan, Uzbekistan, and Zimbabwe are partially offset by reductions for some African Franc Zone countries, Syria, and Paraguay. U.S. estimated mill use and ending stocks reflect recent revisions from the Bureau of the Census beginning in 2003/04.

Approved by the Secretary of Agriculture and the World Agricultural Outlook Board, Gerald A. Bange, Chairperson, (202) 720-6030. This report was prepared by the Interagency Commodity Estimates Committees.

APPROVED BY:

CHARLES F. CONNER
ACTING SECRETARY OF AGRICULTURE

INTERAGENCY COMMODITY ESTIMATES COMMITTEES

Note: The World Agricultural Outlook Board reviews and approves the World Agricultural Supply and Demand Estimates (WASDE) report. The Board's analysts chair the Interagency Commodity Estimates Committees (ICECs) that prepare the monthly report.

1/ Fiscal years beginning Oct 1. Includes Puerto Rico. Historical data are from FSA, "Sweetener Market Data" except imports (U.S. Customs Service, Census Bureau). 2/ Production projections for 2005/06 are based on March 31 Prospective Plantings and trend yields. 3/ Actual arrivals under the tariff rate quota (TRQ) with late entries, early entries, and TRQ overfills assigned to the fiscal year in which they actually arrived. For 2006/07, includes only U.S. commitments under current trade agreements, minus shortfall of 50,000 tons. The Secretary will establish the actual level of the TRQ at a later date. 4/ Includes sugar under the re-export and polyhydric alcohol programs. 5/ Includes high-tier and other. 6/ Transfers to sugar-containing products for reexport, and for nonedible alcohol and feed. 7/ Residual statistical discrepancies.

1/ Upland and extra-long staple; marketing year beginning August 1. Totals may not add due to rounding. 2/ Based on Bureau of Census data. 3/ Reflects the difference between the previous season's supply less total use and ending stocks based on Bureau of Census data. 4/ Cents per pound. The 2005/06 price is a weighted average price for upland cotton for August-April. 5/ USDA is prohibited by law from publishing cotton price projections. * Planted area reported in March 31 "Prospective Plantings." Projected harvested area based on 1996-2003 U.S. average abandonment. Projected yield per harvested acre based on 2002-2005 U.S. average yield per harvested acre.

Note: Public Law 106-78, signed October 22, 1999, requires the Secretary of Agriculture to estimate and report the U.S. upland cotton season-ending stocks-to-use ratio, excluding projected raw cotton imports but including the quantity of raw cotton imports that has been imported during the marketing year. Pursuant to this requirement, the estimated ratio for 2005/06 is 29.5 percent.

1/ Simple average of monthly prices calculated by AMS from NASS weekly average dairy product prices for class price computations. Details may be found at http://www.ams.usda.gov/dyfmos/mib/fedordprc_dscrp.htm. 2/ Annual Class III and Class IV prices are the simple averages of monthly minimum Federal order milk prices paid by regulated plants for milk used in the respective classes. All milk price is the simple average of monthly prices received by farmers for milk at average test. 3/ Does not reflect any deductions from producers as authorized by legislation.

Note: Tables on pages 35-37 present a 25-year record of the differences between the June projection and the final estimate. Using world wheat production as an example, changes between the June projection and the final estimate have averaged 15.8 million tons (2.9%) ranging from -32.2 to 29.6 million tons. The June projection has been below the estimate 15 times and above 10 times.

1/ Final estimate for 1981/82-2004/05 is defined as the first November estimate following the marketing year and for 2005/06 last month's estimate. 2/ May not total 25 if projection was the same as final estimate. 3/ Includes corn, sorghum, barley, oats, rye, millet, and mixed grain. 4/ Global soybean supply and use projections were initially released in June 2004. Therefore, an insufficient number of observations are available to provide meaningful reliability statistics for global soybean supply and use.

1/ See pages 35 and 36 for record of reliability for U.S. wheat, rice, soybeans, and cotton. 2/ Final estimate for 1981/82-2004/05 is defined as the first November estimate following the marketing year and for 2005/06 last month's estimate. 3/ May not total 25 for crops and 24 for animal production if projection was the same as the final estimate. 4/ Calendar years 1982 thru 2005 for meats, eggs, and milk. Final for animal products is defined as latest annual production estimate published by NASS.

Related USDA Reports

The *WASDE* report incorporates information from a number of statistical reports published by USDA
and other government agencies. In turn, the *WASDE* report provides a framework for more detailed
reports issued by USDA's Economic Research Service and Foreign Agricultural Service. See http://www.usda.gov/oce/waob/related.htm for an explanation of related reports.

Supply and Demand Database

The Foreign Agricultural Service publishes Production, Supply, and Demand Online, a comprehensive database of supply and demand balances by commodity for 190 countries and regions at http://www.fas.usda.gov/psd/. Data for grains, oilseeds, and cotton are updated monthly and data for
other commodities are updated less frequently.

Foreign Production Assessments

Preliminary foreign production assessments and satellite imagery analysis used to prepare the *WASDE*
report are provided by the Production Estimates and Crop Assessment Division (PECAD) of FAS.
PECAD is located at www.pecad.fas.usda.gov/

2007 Agricultural Outlook Forum

March 1-2, 2007
Crystal Gateway Marriott Hotel
Arlington, Virginia

USDA's annual Agricultural Outlook Forum provides timely forecasts of farm prospects and insight into developments affecting commodities and the farm economy. Speakers include the Secretary of Agriculture and other top Government officials, industry analysts, farmers, business leaders, and other experts in agriculture-related fields.

Attendees include agricultural forecasters from Government, universities, and the private sector who meet to discuss economic prospects and the outlook for the current leading topics in agriculture for U.S. and world agriculture over the coming year.

To download speeches from the 2006 Forum, visit:
